REF: Your Letter of April 1, 1983

Dear Mr. Savage:

The hazardous waste material generated by this plant is less than 1,000 Kg in any one month, making us a small generator.

We will be disposing in a permitted approved I.E.P.A. landfill. We do not store 1,000 Kg longer than 90 days.

This is a request for small generator classification.

Sincerely,

F. A. Bensley
Quality Control Supervisor
